

Processing QRT Calls

We receive an email on Monday and Thursday mornings through the dispatch@hamiltoncounty.in.gov email address. Each email tells us the members on each of the teams that day and possibly the location where they are going. A copy of this email is located at the Carmel Police console as well as the Noblesville/Westfield console. Each of the teams mark out with their respective police dispatch channel as "QRT". The QRT unit verbalizes their location to dispatch and we place the unit at that location with a "Case Follow Up" call type. When the unit is done at the location, we clear them with "No Report".
